An example script taken from www.cyberciti.biz/tips/spice-up-your-unix-linux-shell-scripts

```bash
#!/bin/bash

tput clear       # clear the screen

tput cup 3 15    # Move cursor to screen location X,Y (top left is 0,0)

tput setaf 3     # Set a foreground colour using ANSI escape
echo "XYX Corp LTD."
tput sgr0

tput cup 5 17
tput rev         # Set reverse video mode
echo "M A I N - M E N U"
tput sgr0

tput cup 7 15; echo "1. User Management"
tput cup 8 15; echo "2. Service Management"
tput cup 9 15; echo "3. Process Management"
tput cup 10 15; echo "4. Backup"

tput bold        # Set bold mode
tput cup 12 15
read -p "Enter your choice [1-4] " choice

tput clear
tput sgr0
tput rc
```
