

Disk Usage

Show the overall disk usage

```
# df
```

To find out how much space a given directory is used

```
# du -s
```

This will output the usage of each partition in the server

```
# df -h
```

To list the size of a specific directory, run the following command:

```
# du -sh /home/
```

If you want to list all the subdirectory sizes under /home, run the following command:

```
# du -sh /home/*
```
