

Net Use bij vpn connectie een unc path koppelen met ander domein/gebruiker

```
Net Use Z: "\\yourUNC\path name" /user:uname password
```

Net Use bij NFS connectie:

```
nfsadmin.exe client start | stop (start NFS in client mode)
mount ipaddress:/path1/path2 Q: (or something else)
showmount -e computername or ip address (what can be mounted)
showmount -a computername or ip address (who mounted what)
showmount -d computername or ip address (mountable maps)
```

```
mount
umount -a (alles)
umount q: (een drive)
net use Q: 10.0.0.198:/path1/path2 /user:name password
```
